PRAKHAR SHARMA

SOFTWARE ENGINEER

EDUCATION

- Bachelor of Technology | Technocrats Insitute of Technology, Bhopal | 2023-2027
- Senior Secondary | The Radiant School, Gwalior | 2020, 2022

CERTIFICATIONS

- Google Cloud Skill Boost – Introduction to Generative AI / 2025
- Google AI Essentials / 2026
- Google Cloud Skill Boost - Introduction to Responsible AI / 2025

SKILLS

- **Programming Languages:**

Python, C++, Java
HTML, CSS, JavaScript (in progress)
GDScript

- **Game Development:**

Godot Game Engine, 2D Game Development, Game Mechanics Design
Sprite Animation Systems, Collision Detection
Tilemap-based World Design

- **Technical Skills:**

Salesforce CRM (in progress)
Git / GitHub
Microsoft Azure: Cloud Computing (in progress)
Data Structures & Algorithms
Object-Oriented Programming

PROFILE

Pre-final year CSE (AI) Software Engineering student with strong skills in Java, C++, Python, AI, game development, and cloud-based technologies.
Passionate about building efficient, scalable, and interactive solutions while quickly adapting to emerging technologies.

PROJECTS

CodeQuest: Syntax Scrolls

CodeQuest is a 2D RPG built with Godot that turns learning Python into an interactive adventure. Players progress by solving real coding challenges embedded into gameplay mechanics like combat, puzzles, and quests. The project combines game design, programming education, and system architecture to create a fun, immersive way to learn programming fundamentals.

Qualif-AI: AI Interview Simulator

Qualif-AI is an AI-powered Interview Simulator designed to help students prepare for real-world interviews through intelligent, interactive practice sessions. The platform conducts mock interviews using speech-based AI, analyzes candidate responses for content accuracy, communication clarity, and confidence levels, and provides structured feedback for improvement. By combining NLP and speech analysis, Qualif-AI aims to make interview preparation smarter, personalized, and more effective
